The Genesis of Ministerial Decree No. 13 of 2022: A Response to Economic Vulnerability in a Strategic Gulf Node

Ministerial Decree No. 13 of 2022, issued by the Kuwaiti government under Prime Minister Sheikh Sabah Al-Khalid Al-Sabah, emerged not as a sudden policy shift but as the culmination of years of escalating economic fragility and structural vulnerabilities. At its core, the decree sought to restructure the state's role in key industrial sectors—particularly oil, petrochemicals, and foreign investment—amid shifting global energy dynamics and regional competition. Its origins trace back to the early 2010s, when Kuwait's economic model, long reliant on hydrocarbon revenues accounting for over 90% of export earnings, began showing cracks under sustained low oil prices and rising domestic fiscal demands. By 2014, when global oil prices collapsed to under \$30 per barrel, the state's budget deficit widened to over 18% of GDP, exposing a systemic overdependence that could not be sustained. Ministerial Decree No. 13 was thus framed as a calibrated attempt to diversify revenue streams, incentivize private and foreign capital, and recalibrate state intervention in strategic

industries. The decree's legal authority derived from Article 147 of Kuwait's Constitution, which vests the executive in economic planning, and was executed through the Ministry of Commerce and Industry's expanded regulatory mandate. Yet, its formulation reflected a deeper geopolitical calculus: Kuwait's position within the Gulf Cooperation Council (GCC), where economic integration and competitive differentiation coexist uneasily, demanded that Riyadh, Abu Dhabi, and Doha tighten strategic autonomy while maintaining regional cohesion. The decree's architects—largely technocrats from the National Economic Council—sought to embed long-term resilience by formalizing mechanisms for public-private partnership, state-owned enterprise reform, and targeted industrial zoning, all within a legal framework that balanced fiscal prudence with developmental ambition.

Geopolitical and Economic Context: The Crucible of Reform

The early 2020s marked a pivotal juncture for Kuwait's economy, shaped by intersecting pressures: the protracted oil market volatility post-2014, the fiscal fallout of the COVID-19 pandemic, and the growing strategic recalibration of Gulf states amid U.S.-China rivalry and energy transition trends. Kuwait's hydrocarbon-dependent economy, while still robust during the 2016–2018 rebound, faced structural headwinds. The 2020 oil

price war between Saudi Arabia and Russia, followed by pandemic-induced demand collapse, reduced Kuwait's oil
